MELANIE BAYBAY

baybaymelanie@gmail.com | (650)796-2037 | github: mbaybay

Skills

Proficient: Python, Java, MySQL, MongoDB, Microsoft SQL Server

Familiar: Javascript, Vue.js, React.js, D3.js, Hadoop, Spark, Solidity, Tensorflow

Experience

IT Rotation Technical Associate

Kaiser Permanente

July 2018 - Present

3rd Rotation: Cloud Application Platforms

• Enabling developers to deliver cloud native applications by managing, configuring, and testing platform as a service solutions

Skills & Tools: IBM Cloud, Cloud Foundry, Jenkins

2nd Rotation: Kaiser Permanente Research Bank

• Built an ETL pipeline for the KP Research Bank to integrate electronic health records, health surveys, and lab information system data of consented participants from all eight of Kaiser Permanente's regions for precision medicine research *Skills & Tools*: Microsoft SQL Server, Python, SAS

1st Rotation: Strategic Technologies, Blockchain

 Developed a decentralized application that utilized blockchain technology, APIs, and web components for a drug supply chain proof of concept

Skills & Tools: Node.js, React.js, Meteor, RESTful API, Postman, Ethereum, Solidity

Computer Science Tutor

University of San Francisco

Aug 2017 - May 2018

Trained computer science students in improving their software development and debugging techniques

Instructor

Girl Tech Power Summer Workshop

Aug 2017

- Taught the fundamentals of programming to 54 middle school and high school girls
- Led a hackathon that encouraged the girls to envision and build the future of education

Laboratory Assistant

Alexo Therapeutics

Oct 2015 - Aug 2016

• Purified plasmid DNA from yeast cultures and maintained cell lines for immuno-oncology experiments

Administrative Assistant

One Medical Group

June 2015 - Aug 2015

• Served as a liaison between patients, insurance companies, and pharmacies

<u>Software Projects</u>

- **Cohort Med:** A web application for data analysts to build patient cohorts from electronic medical record data and export them as a de-identified dataset for medical research
 - Tools: Vue.js, Node.js, Express.js, MySQL
- **Wellness Tracker:** A web application for individuals to track and reflect on their wellness activities. *Tools:* Vue.js, Node.js, Express.js, MongoDB

Publications

Wilson, J.D., Baybay, M., Sankar, R., and Stillman, P. **Multi-node2vec: Fast Feature Engineering for Multilayer Networks.** (Submitted. Preprint: https://arxiv.org/pdf/1809.06437.pdf, Code: https://github.com/jdwilson4/multi-node2vec)

Education

Master of Science, Computer Science

University of San Francisco

Aug 2016 - May 2018

Bachelor of Science, Biology

University of San Francisco

Aug 2011 - May 2015
